**ONTARIO COUNTY SEEKS RESIDENT INPUT ON RECYCLING AND  
SOLID WASTE MANAGEMENT PLANNING**

**The Department of Sustainability and Solid Waste Management Fields Community Survey**

**CANANDAIGUA, N.Y. (April 22, 2020)** – Over the next few weeks, the Ontario County Department of Sustainability and Solid Waste Management is engaging county residents through a community-wide survey. The resident input being gathered will be used in the development of the Department’s Strategic Plan. The Strategic Plan will outline policy objectives, planning actions, events and activities related to recycling and waste diversion efforts in the future.

“The ideas and opinions of people in our community will be critical to our recycling and waste management plans for the next eight years, and beyond.” said Carla Jordan, the director for the Ontario County Department of Sustainability and Solid Waste Management.

Developed in collaboration with Causewave Community Partners, the anonymous, countywide survey, is being made available for residents to complete online.

The deadline to complete this survey is May 8, 2020. To submit your opinion please complete the survey online at: [www.OntarioCountyRecycles.org](http://www.OntarioCountyRecycles.org)

###

The Department of Sustainability & Solid Waste Management provides information and resources to support Ontario County residents in their recycling and waste reduction efforts throughout the year.
