

## HPV BY THE NUMBERS

**14,000,000**

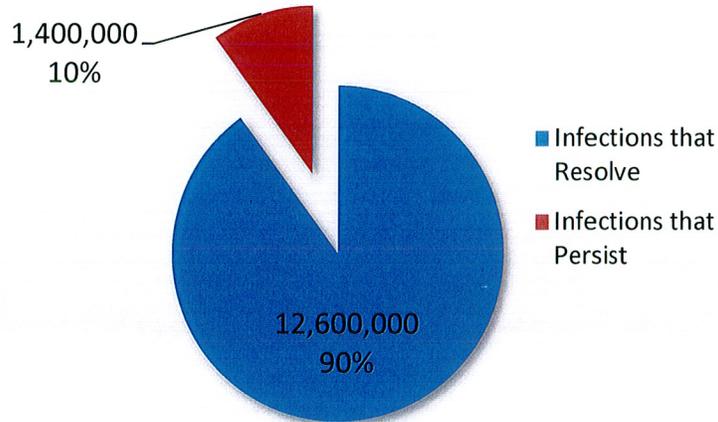

**New HPV infections each year in US**

12,600,000

HPV infections that go away on their own within 2 years (90%)

1,400,000

HPV infections that do not go away on their own (10%)

**56,000,000**

**Doses of HPV vaccine given to females in the US, June 2006-March 2013**

55,978,806

No adverse events reported (99.96%)

21,194

Total adverse events reported (0.04%)

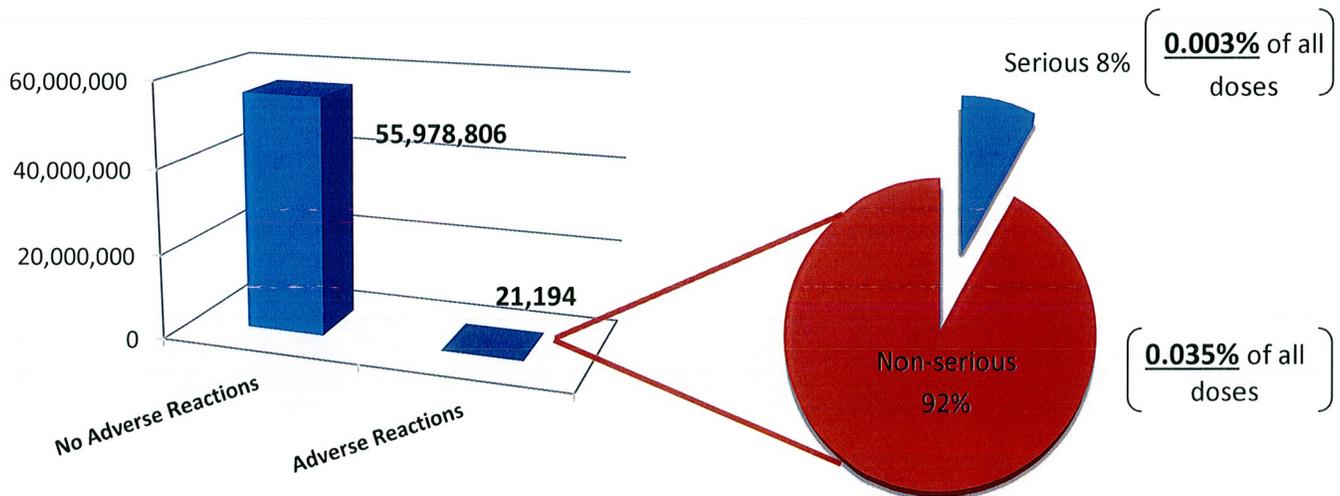

19,499

Non-serious adverse events reported (0.035%)

1,695

Serious adverse events reported (0.003%)

### Adverse Reactions to HPV Vaccine 2006-2013, US

(Adapted from CDC, 2013)

A woman's lifetime risk of getting cervical cancer is **1 in 152** or **0.66%**; about **17 times** that of having an adverse reaction to HPV vaccine (American Cancer Society, 2013).
